

 **UNMANI TESTIMONIALS**

My boys are 5 and 7. I was a little hesitant to start them so young but they have responded so well to the Simply Music teaching method. They have had only 14 lessons and already are playing whole pieces and are so keen to learn more. This is such an inventive fun way of learning, my kids don't even need to be asked to practise. They are more confident in themselves and trust their ability more. I also relish the time spent with them each day as we enjoy playing and learning together.

Well this beats Suduko- my brain is getting a wonderful workout with the pleasure of playing piano in a way I never imagined. Who would have thought that I would be playing the piano without music within weeks of starting lessons with my wonderful simply music teacher? Having learnt to play in a traditional method in my youth, I despaired of ever playing again except to tinkle around aimlessly. I now have direction, a beginning repertoire and a wonderful challenge to learn differently. Mostly it is just fun. Do it with a friend!

The Simply Music program has become part of my life and I enjoy learning to play. It's great to be able to sit down at the piano knowing a lot more about what I am doing as I play, makes it even more enjoyable.

I believe a lot of people would benefit from the system if they would only give it a go.
